SUMMARY

I'm a Mobile and Backend Developer based in Brazil with solid experience in building entire systems from scratch. I've been working with code since 2012, helping businesses to solve their problems through technology.

EXPERIENCE

LAUNDRO
12/2021 - 11/2022
LEAD SOFTWARE DEVELOPER

I built the whole technology stack of the company. Even though I wasn't at the beginning of the app's development, when I joined the company, the only existing code was a real-time database built using Firebase. I implemented TypeScript and AdonisJS to create a new API and to deliver a full-featured server capable of handling payments and integrating with multiple external applications (for partners), as well as a set of tools for the operations team. Afterward, I rewrote the app to make it capable of using the new APIs and native payments.

- Responsible for whole tech stack
- TypeScript
- React Native
- AdonisJS
- PostgreSQL
- Redis
- Heroku

WORLDPACKERS
06/2018 - 12/2021
SENIOR ANDROID DEVELOPER

I worked as the main Android Developer, improving two apps (travelers and hosts). I led the migration of the host's app to Kotlin Multiplatform and the modern view systems (Compose and SwiftUI). Meanwhile, occasionally I helped the web development team with Ruby on Rails tasks and bug fixes.

- Android
- Java
- Kotlin
- iOS
- Swift
- Kotlin Multiplatform
- Compose
- SwiftUI
- Ruby on Rails
- Heroku

INGRESSO RAPIDO
10/2016 - 10/2017
SENIOR ANDROID DEVELOPER

I worked as an Android Developer, responsible for the ticket reader app used in concerts and theaters to validate tickets. I delivered a way to minimize fraud using local broadcasts on the intranet and the ability to use a USB barcode scanner attached to an Android device to increase speed in operations.

- Android
- Java
- Kotlin

GRUPO VERISOFT
01/2014 - 10/2016
SENIOR ANDROID DEVELOPER

I worked as Main Android Developer, building white-label applications for mobile carriers. We made a Ferrari sticker album app used by Claro (a mobile carrier) in Mexico. For a few months, I was the only one developing "Vivo TreinApp" on the web, an internal web app used by Vivo (a mobile carrier) to train employees.

- Android
- Java
- Ruby on Rails

PINUTS STUDIOS
02/2013 - 01/2014
ANDROID DEVELOPER

Pinuts was an outsourcing company focused on the mobile market. I was hired as a Rails developer, but then switched to Android Developer after the first month.

- Android
- Ruby on Rails

MENKI GAMES
01/2012 - 01/2013
DEVELOPMENT INTERN

I joined Menki as an intern to develop mobile games using Lua & CoronaSDK. I have acquired extensive knowledge about Lua, Ruby on Rails, APIs, and Android native.

- Lua
- CoronaSDK
- Android
- Ruby on Rails
